ENV 12 Refrigerants can be used instead of **R134a** in all **R134a A/C** systems, including **R134a** installed in **R12 Retrofitted systems**, with energy savings of up to **40%** over **HFC-134a**.

5 oz - **ENV5 - 12 Refrigerant**
= **13.3 oz HFC134a**
and = **15 oz R12** Substitutes.

ENV Refrigerants are installed as a liquid because they are *2/3 lighter* than HFC and CFC products. Read install instructions on cans and cylinders for liquid installation procedures.

Do not mix - ENV5 with other refrigerants!

In the event you pull a vacuum before installing ENV5, always release back to (0) before installing ENV5.
